Components*

INDUSTRY 4.0

ALL-ROUND MANUFACTURER FOR THE SUPPLY OF STAINLESS STEEL COMPONENTS

"What does working with Martin SPA mean?" and "how can working with us improve your productivity?"

These could be some of the questions you would like an answer, when deciding if starting a partnership is the right thing to do.

But if you happen to pay Martin's facilities a visit, you will quickly realize the potentialities of this young yet experienced enterprise.

Precision turnery since 1970, Martin SPA, quickly developed from a simple workshop based on subcontracting to a full grown company, structured around its own product lines.

With a machine park of nearly 5.000sq, 55 CNC work centers, 6 hack-saws for raw material set-up and the latest technology like the Industry 4.0, Martin is able to supply the mechanical industry as a whole, with a huge variety of standard products.

It goes even further when the technical office meets the engineers. Being a dynamic company, Martin can support customers by developing new products, even from scratch.

Thanks to all this, Martin is able to meet the requirements of ever demanding markets and looks forward to increase its presence world-wide.

Martin SPA

WHAT CAN WE DO FOR YOU?

● Standard products

A comprehensive range of leveling mounts, unique in the entire international panorama.

Plastic, Steel, Stainless Steel, Hygienic... for all industrial sectors, for all applications, for all demands.
